

## **Drone Policy**

**This is in addition to legal requirements of drone operation by the Civil Aviation Authority**

Any member or helper using a drone within our projects is required to observe legal guidance by the CAA.

The SDP drone is a Syma X8G, with ownership label attached to the main body of the drone, to designate it as ours.

All members involved in drone-related work will receive a safety briefing on the project and is expected to adhere to the law.

No member will operate the drone without express permission.

All locations where we expect to operate the drone, will be informed and permission sought in advance. The only exception is if we have taken the drone well away from people/ houses, for practice / training flights
