

## **Public Photography Policy**

The photographer is to carry SDP business cards and provide them if there are any queries.

If we post a picture on our social media, showing members of the public, those persons may contact us at any time to request removal of the image.

If members of the public wish to use photos for their own non-commercial use, they must contact us for permission. If permission is granted, they agree to display links and full credit to us for the image. We remain the owners of the image.

The photographer is to avoid photographing children among the public, with especial attention to avoiding recording faces, and all images of children must be strictly with the permission of parents. (no permission, no photo!)

A photographer with us agrees not to make images of nudity, changing clothing, anything sexual, - if you cannot show your grand mother, then don't record it!

A photographer is not to touch the people being photographed without their permission.

All members involved in drone-related work will receive a safety briefing on the project and is expected to adhere to the law.
